THIS MONTH'S COVER PICTURE

One of the posters published at the Futema Printing Plant by the Information and Education Department, Military Government. Titled "A Bridge to Democracy", it points out that democracy is built upon the foundations of duties and rights. Democracy can never be established without the support of the people who are willing to assume their duties and responsibilities.

The bridge from a Ryukyus under militarism to a democratic, united Ryukyus must be supported by the ideals of freedom of the press, respect for human rights, freedom of thought, freedom of religion, recognition of group responsibility, unselfish cooperation; interest in the advancement of mankind, and democratic benefits for all. Three thousand copies of this poster were distributed throughout the Ryukyus. (See paragraph 7 - INFORMATION)

Directives

1. Military Government Directive No. 16, "Corporation and Liquidation Surplus Taxes", issued 11 May 1949, effective 1 April 1948 is a supplement to Military Government Directive No. 17, dated 23 April 1947. This directive establishes a 35 percent normal tax on the net income of all corporations plus a surtax computed on the net income of corporations. Provisions are also made for a 35 percent liquidation surplus tax.

Northern Ryukyus Military Government Directive No. 1949-5, "Ship Confiscated by Military Government Provost Court", issued and effective 3 May 1949, provides for the confiscation of a 41-ton ship, Kazu Maru No. 3. The ship was confiscated according to U.S. Naval Military Government Proclamation No. 3, "Exceptional Military Courts", Article 5, Section 4.

Southern Ryukyus Military Government Directive No. 7, issued and effective 28 March 1949, prohibits the provisional governments in the Southern Ryukyus from making loans from government funds to any person or organization without approval of Military Government. Transfer of funds between governmental sections must also have approval of Military Government.

2. The Ryukyus Military Government Plans Board was established in May. The purpose of the board is to study economic and financial problems and prepare plans thereon. Some of the problems to be dealt with are: the tax program; permanent housing and resettlement program; relationship between wages and prices; import-export program; interisland trade; efficient use of labor supply and such other tasks and responsibilities as may be assigned to the board by the Military Governor.

POLITICS

3. A petition from the city, town and village mayors of Oki-

nawa Gunto was submitted to Military Government, requesting the hastening of land ownership recognition and setting forth the needs for early land ownership policy. Military Government answered this petition by pointing out the difficulties resulting from destruction of all records during the war. The petitioners were assured that the problem is being studied and the details would be worked out as soon as possible.

4. A petition signed by 29,888 persons from Central Okinawa, headed by Shiroma, Seizen, Mayor of Goeku, was presented to the Okinawa Military Government Team in May, stating that the Enterprise and Income Tax was beyond the people's ability to pay. The reasons for their inability to pay were:

- (1) Less farm land available.
- (2) Increase in population due to repatriation.
- (3) War damage.
- (4) Drought, typhoon and insects.

5. At the regular monthly meeting of the Mura Assemblymen's Association, three petitions were submitted to the Okinawan Civilian Administration and Military Government. One requested that the quantity of goods now supplied be continued after July and that prices of these supplies be reduced to those of 31 December 1948; the second, remission of income taxes; the third was in four parts, improvement of communication and transportation, grant of permission for breeding domestic animals, establishment of standard taxation, and the establishment of a weights and measures inspection office.

6. Four more meetings of the "United Front" of the three political parties, Democratic Alliance Party, People's Party and the Socialist Party, of Okinawa were held. Date, place and estimated attendance were as follows:

1 May	Naha	3,000
2 May	Itoman	1,500
4 May	Ishikawa	1,000
6 May	Nago	1,000

The speeches at these four meetings did not seem to follow the proposed policies decided upon at the 22 April meeting, but became involved in a discussion of mura store prices, disposition of money collected through mura store sales, utilization of land by the Armed Forces, income tax payments for 1948, and governmental use of tax money.

7. To counteract the misleading statements of members of some political parties the officials of the Okinawan Civilian Administration, backed by Military Government, decided to hold meetings at various cities over the island using local speakers and members of the Okinawan Civilian Administration to explain to the people the workings of their government. Surveys by political experts of Military Government indicate that the political unrest in Okinawa is caused in part by ignorance of the people regarding their government.

Ryukyus Rice Production and Land Reclamation Authority

2. A total of 2,048 feet of 8 inch pipeline has been reestablished in the mountains of Hanoji in Northern Okinawa. Water controlled by this pipeline benefits approximately 150 acres of rice fields.

Two concrete dams in Northern Okinawa have been rebuilt impounding a natural overflow which can be let in to irrigate approximately 400 acres of rice paddies. One dam was completely destroyed by the war, the other partly destroyed. The dams were rebuilt, according to American plans, by Okinawan irrigation engineers, assisted by Engineering Projection and Public Works personnel.

Food Processing

1. Food processing in the Ryukyus is shown in the table below. On Okinawa there was an increase in salt production due to adequate fuel received by one of the salt factories; the increase of miso reflects an increase of raw material used for its production. The decrease of starch on Okinawa was caused by shortage of sweet potatoes suited for its production. The increase of tea production and the decrease in rice cleaning on Okinawa is seasonal. In the Northern Ryukyus salt production decrease was caused by needed repairs of salt fields; sake decrease was due to lack of raw material. Favorable weather accounts for increase of salt production in the Southern Ryukyus.
